

# Ruby Syntax

---

The Ruby syntax is large and is split up into the following sections:

## Literals

Numbers, Strings, Arrays, Hashes, etc.

## Assignment

Assignment and variables

## Control Expressions

if, unless, while, until, for, break, next, redo

## Methods

Method and method argument syntax

## Calling Methods

How to call a method (or send a message to a method)

## Modules and Classes

Creating modules and classes including inheritance

## Exceptions

Exception handling syntax

## Precedence

Precedence of ruby operators

## Refinements

Use and behavior of the experimental refinements feature

## Miscellaneous

alias, undef, BEGIN, END
