

# Strings Fundamentals

---

```
# =>
# Ruby Strings
# In Ruby, strings are mutable

# # Can use " or ' for Strings, but ' is more efficient
puts 'Hello World'
# => Hello World

# # String concatenation
puts 'I like' + ' Ruby'
# => I like Ruby

# # Escape sequence
puts 'It\'s my Ruby'
# => It's my Ruby

# # displays the string three times
puts 'Hello' * 3
# => HelloHelloHello

# # Defining a constant
# # More on Constants later, here
# # http://rubylearning.com/satishtalim/ruby\_names.html
PI = 3.1416
puts PI
# => 3.1416
```
